21. Choose a name or give your thermometer a custom name

Cancel   **Thermometer name**

Name the thermometer:

Forecourt

Backyard

Swimming pool

Custom

22. Use the included screwdriver to loosen the six screws on the large end of the body.

Then, open the battery cover on the center part, install the two included AAA batteries,

and reattach the cover using the small screw

23. Tap "Scan" to scan the QR code on the side of battery box using your phone or manually enter the number under the QR code into the app, then click "Add"

24. Close the housing

Close the housing by tightening it with
six screws.

Thermometer
Online | 70.2°F
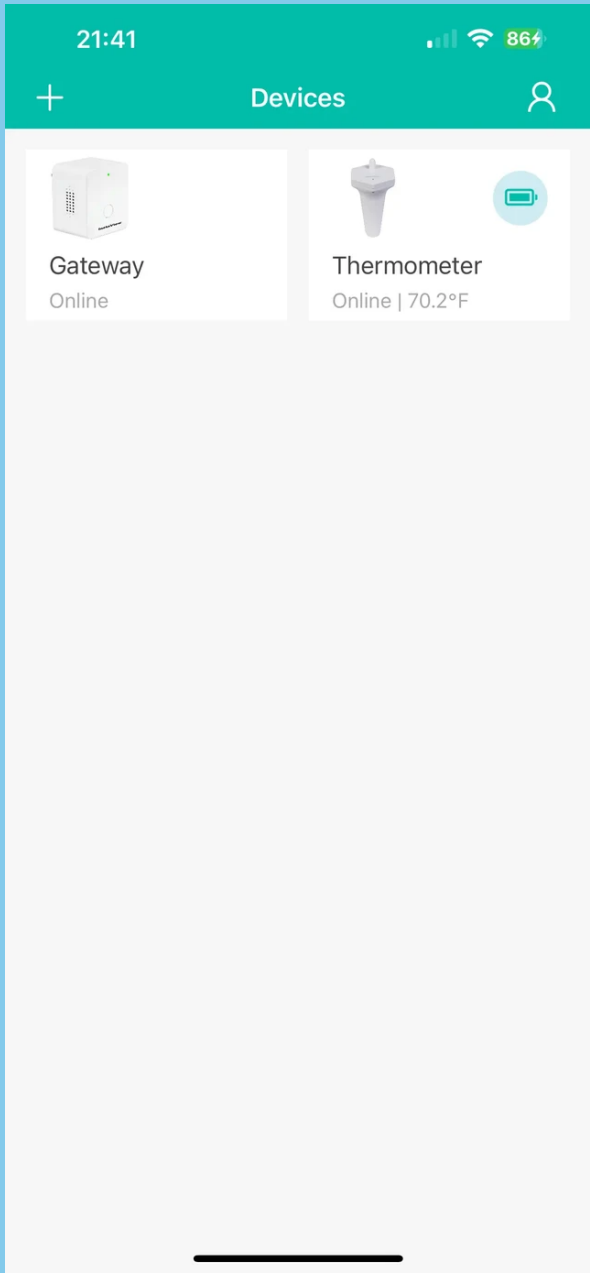

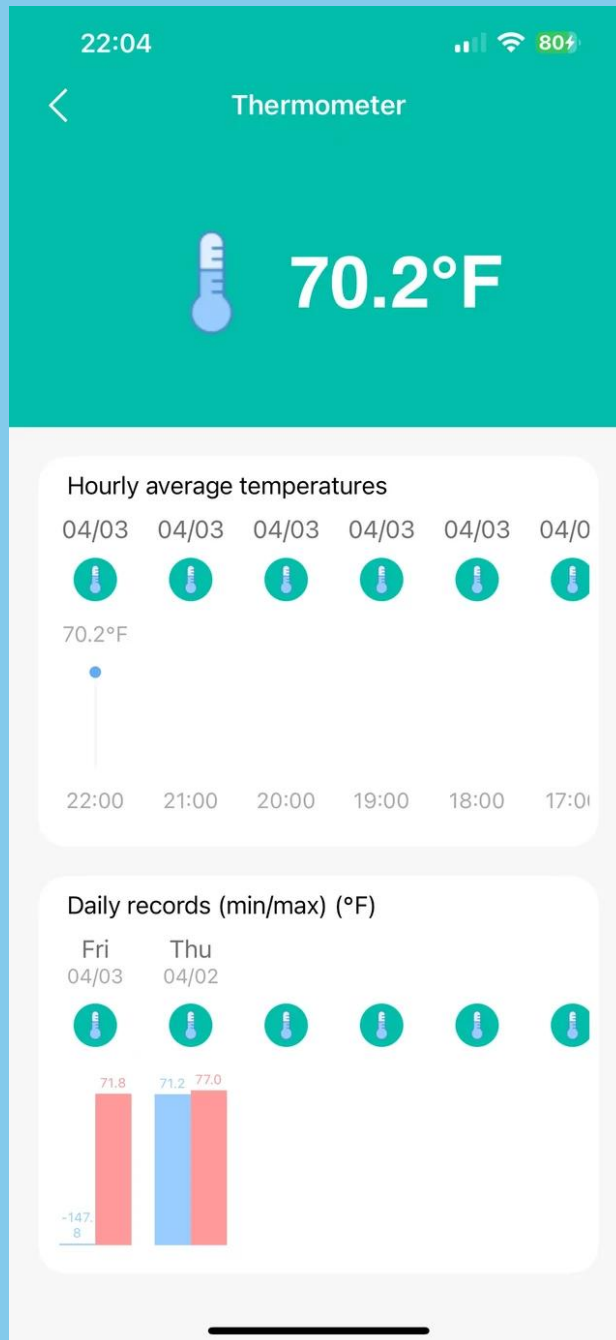

29. Secure the thermometer to the edge of the pool. Ensure that it is positioned where it won't be easily bumped by swimmers.

During setup, whenever you are asked for a choice,

choose 'Yes' or '"Allow While Using App"' so it can go smoothly.

You have completed the required steps.

The following steps are optional.

30. **How to Share the Device with family members on the InstaView App**

There are two methods of sharing.

Method 1:
The first method is for all of your family members to use one account and password.

The same account can be logged into on different smartphones, and all users will have

the same level of access.

Method 2:
The second method involves each family member having a different email address, next are
the steps.

The family member with whom you want to share the device must first have an account.

They will need to download the InstaViewSafe app to their phone and tap "Register" to
create an account.

Please note: The family member does not need to set up the gateway again. The following
are the detailed steps:

Step 1:

Before sharing, your Gateway and sensors (Mailbox or Thermometer)

must be successfully set up.
To get started, tap the top-right icon.
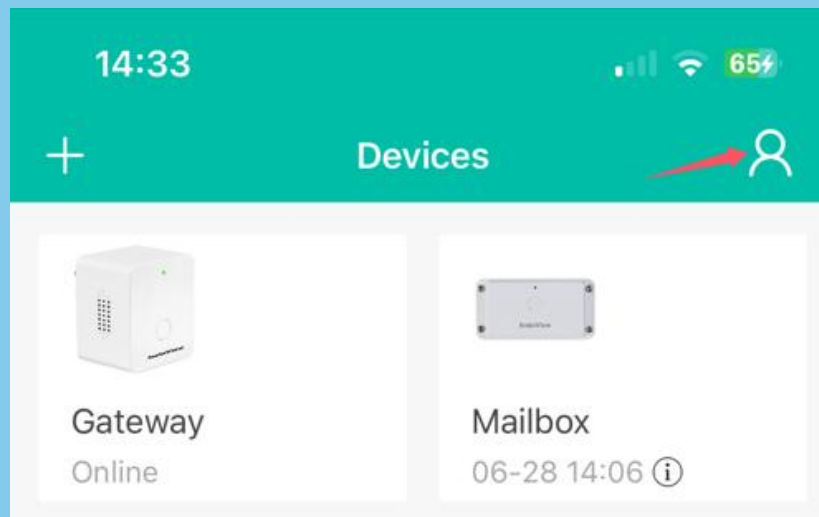

Step 2:

Select the "Share with Family" option from the menu.

Step 3:

Tap the **"+"** icon.

14:24

Accounts   +

Tap this to add shared account

Step 4:

Select the gateway, and then tap "Next".
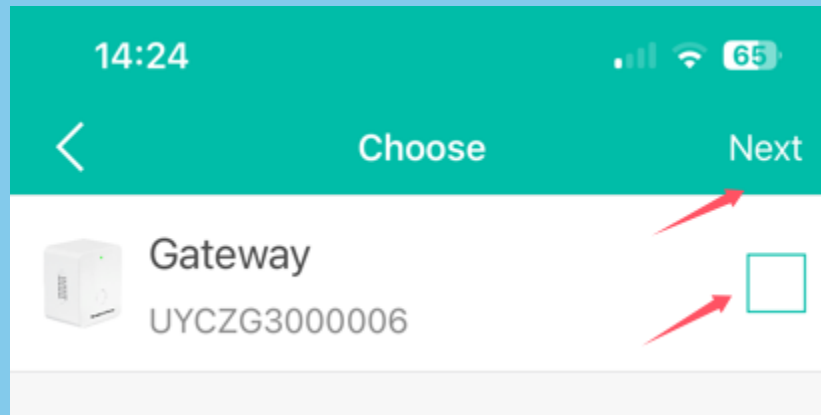

Step 5:

Enter the email address with which you can share access to the mailbox

or other sensors. **Please note** Your family member must first register an account using

their email on the **InstaViewSafe** app before you can share mailbox access with them.

Step 6:

A verification code will be sent to the email address.

Retrieve the code and enter it here.

How to Contact Customer Service?

If you need assistance, you can contact support at
support@wirelessinput.com.

Please allow 24 to 48 hours for a response.

When to Reset the Gateway?

A reset may be necessary if:

1. Your Wi-Fi password has changed, or

2. The gateway does not speak when plugged into a wall outlet for the first time.

To reset it, use a SIM card ejector pin or a thin needle. Insert it into the small hole

on one side of the gateway, then press and hold for 8 seconds.

The gateway will speak and confirm that it has been reset successfully.

How to Share the thermometer with Family Members?

Please refer to **Section 30**: "How to Share the Device

with Family Members on the InstaView App."
